TECHNICAL SKILLS

Languages: C, C++, HTML, CSS, JavaScript, Lua, SQL
Operating Systems: Windows, OS X, Linux

- Experience as an active and enthusiastic member of agile development teams

WORK EXPERIENCE

Autodesk Inc., Montreal, QC **January – August 2016**
Software Developer

- Contributed to rebranding and stabilization efforts in the version 1.0 release of Autodesk LIVE
- Leveraged the Stingray game engine to improve in-app navigation
- Refactored the way Point of Interest data is loaded when opening new or updated datasets
- Enhanced the responsiveness of the iOS Viewer app to multi-touch input
- Can read more about my experience here: My Time with Autodesk LIVE

Autodesk Inc., Toronto, ON **January – April 2015**
Software Developer

- Worked with team porting 123D Sculpt+, a 3D modelling app, to Windows and Windows Phone
- Developed split-screen user control to display a preview of the sculpture alongside menu options
- Implemented UI features for users to publish their sculpture to the in-app marketplace, share over social media or email and upload to a third party server for 3D printing

Communitech Technology Association, Kitchener, ON **January – April 2014**
Application Developer

- Applied creative thinking skills to design and prototype an intuitive UX for the UrtheCast iPad application
- Implemented the app's contact form to store client data and capture and crop photos of business cards
- Leveraged the Google Places API to build a search bar to query and plot geographical locations

Bank of Montreal, Toronto, ON **April – August 2013**
eBusiness Specialist

- Responsible for managing content on BMO InvestorLine and internal webpages
- Proposed Google Analytics features to the team to monitor and evaluate user experience more effectively

PROJECTS

utoronto.ewb.ca: Redesign of the University of Toronto Engineers Without Borders WordPress site
WLP4gen: Compiler for WLP4 programming language (subset of C) including scanner, parser and type-checking system
ChamberCrawler3000: Rogue-like game developed in C++ using OOP principles and design patterns

EDUCATION

Bachelor of Computer Science, University of Waterloo **September 2012 - Present**
Bachelor of Business Administration, Wilfrid Laurier University **September 2012 - Present**

AWARDS
