TECHNICAL SKILLS

Languages: C/C++, Python, SQL, HTML, CSS, JavaScript

- Strong background in applying agile processes to deliver quality software in accordance with project deadlines

WORK EXPERIENCE

Autodesk Inc., Montreal, QC

Software Developer, 3ds Max (C++, Python) **Sept. 2017 – Oct.2019**

- Refactored legacy tools to integrate a Qt-based UI and enhance performance using modern C++ features
- Developed a dedicated hotkey editor for users to easily customize and manage their shortcuts configuration
- Expanded test coverage and minimized regressions by writing Google Tests for all new features

Software Developer, Autodesk Live (Stringray game engine, C++, Lua)

- Refined the application architecture to improve the readability and extensibility of the codebase
  - Addressed tech debt, removed dead code and added documentation to all major components
- Developed a plugin for the Stingray editor to browse project files and identify memory-intensive assets
  - Reduced the size of the project from 114MB to 82MB

Software Developer Intern, Autodesk Live (Stringray game engine, C++, Lua) **Jan. 2016 – Aug. 2016**

- Enhanced in-scene navigation tools to allow architects to intuitively navigate their designs in 3D space
- Improved the responsiveness of the iOS app to multi-touch input
- Read more about my experience here: My Time with Autodesk LIVE

Autodesk Inc., Toronto, ON **Jan. 2015 – April 2015**

Software Developer Intern (C#, YAML)

- Worked with the team porting 123D Sculpt+, a digital sculpting app, to Windows and Windows Phone
- Implemented UI features to publish sculptures to the in-app marketplace and third-party services

Communitech Technology Association, Kitchener, ON **Jan. 2014 – April 2014**

Application Developer Intern (Objective-C)

- Designed and implemented an intuitive UX for UrtheCast Corp.'s iPad app, intended to help sales personnel better market the company's earth observation technology

Bank of Montreal, Toronto, ON **April 2013 – Aug. 2013**

eBusiness Specialist Intern (HTML, CSS, JS)

- Designed and updated content for BMO InvestorLine, the bank's online trading platform
- Proposed Google Analytics features to more effectively evaluate trends in site traffic

VOLUNTEER EXPERIENCE

EPOCH **Oct. 2019 - Present**

Software Developer (React, Python, GraphQL, SQL)

- Implement features for web app that connects companies with volunteer opportunities in their community

ONETrack International **May 2019 - Present**

IT Operations Manager

- Created IT solution for partner organization to facilitate monthly donations to sponsor orphans in Cameroon
