TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript, Python, C++

- Strong background in applying agile processes to deliver quality software in accordance with project deadlines

EDUCATION

Bachelor of Computer Science, University of Waterloo — Waterloo, ON • 2017
Bachelor of Business Administration, Wilfrid Laurier University — Waterloo, ON • 2017

WORK EXPERIENCE

Autodesk Inc., Montreal, QC
Software Developer, 3ds Max — **Mar. 2018 – Present**
3ds Max is a 3D modelling, animation and rendering tool with a complex codebase including decades of legacy code.

- Collaborate with developers, designers and QA to modernize legacy UI components using current best practices
- Volunteer for technical investigations and effectively communicate findings with the team
- Expand test coverage and minimize regressions by writing Google Tests for all new features

Software Developer, Autodesk Live — **Sep. 2017 – Mar. 2018**
The Autodesk Live application is a cross-platform, 3D visualization tool built using Stingray, Autodesk's game engine.

- Refined the readability and extensibility of the codebase before offering it to users for customization
  - Addressed tech debt, removed dead code and added documentation to all major components
  - Reduced the size of the project from 114MB to 82MB and the number of lines of code by 56%
- Developed a plugin for the Stingray editor to browse project files and identify memory-intensive assets

Software Developer Intern, Autodesk Live — **Jan. 2016 – Aug. 2016**

- Contributed to transitioning the project from a prototype to a product by enhancing key workflows
- Improved the responsiveness of the iOS app to multi-touch input
- Read more about my experience here: My Time with Autodesk LIVE

Autodesk Inc., Toronto, ON — **Jan. 2015 – Apr. 2015**
Software Developer Intern

- Worked with the team porting 123D Sculpt+, a digital sculpting app, to Windows and Windows Phone
- Implemented UI features to publish sculptures to the in-app marketplace and third-party services

Communitech Technology Association, Kitchener, ON — **Jan. 2014 – Apr. 2014**
Application Developer Intern

- Designed and implemented an intuitive UX for UrtheCast Corp.'s iPad app, intended to help sales personnel better market the company's earth observation technology

Bank of Montreal, Toronto, ON — **Apr. 2013 – Aug. 2013**
eBusiness Specialist Intern

- Designed and updated content for BMO InvestorLine, the bank's online trading platform
- Proposed Google Analytics features to more effectively evaluate trends in site traffic

Volunteer Experience

Web Developer - Engineers Without Borders Canada, University of Toronto Chapter 2016-2017

- Designed, curated content and implemented the chapter's website to recruit members and keep them informed about upcoming events
- Click to view a photo archive of the WordPress website
